KAPI'OLANI
THE SEX ABUSE
TREATMENT CENTER

Successful reopening of our State requires us to take precautions to stay safe. In addition to social distancing, masking, and hand washing, we want you to have safety information of another kind.

Since the lifting of the stay-at-home order, the Sex Abuse Treatment Center has seen an increase in the number of alcohol-related sexual assaults being reported. In response, we are offering a series of webinars focusing on the high-risk intersection of alcohol and sexual violence, and information needed to increase safety.

Join us for a webinar designed for high school and college students, as well as parents wanting to be informed. Through the viewing and discussion of "**SHOTS**," a short film developed by the SATC and the Hawai'i Coalition Against Sexual Assault, we'll bring this high-risk intersection to life for you. Learn what contributes to the danger, and what can be done to reduce risk.

The webinars will be held at different times. See below for a day that works for you.
